

Rosary House - Brief Summary

Rosary House itself is an attractive house set in extensive level grounds of approximately 1.25 acres. The house has three reception rooms downstairs and four double bedrooms upstairs.

The property is served by mains gas and drainage and incorporates full gas central heating. The kitchen is fitted with integral refrigerator, oven and dishwasher, and an adjacent utility room provides space for further appliances. The house is in good decorative order throughout.

The large double garage is detached from the house and can be entered via a door at the rear. In the planned development the large rear garden and read land is retained with the house, as is the garage.
